USAGE INSTRUCTIONS

Utilization of the entire seating surface: The surface of the anatomical seat must be fully occupied. Only in this way is the correct contact with the backrest ensured, and therefore adequate support.

MAINTENANCE AND CLEANING

Metal Parts: For cleaning, use specific products for polishing metals, in order to slow down the natural oxidation due to contact.

Covering and Padding: Any stains on the fabric covering can be removed either with neutral mild detergents or with specific products indicated by the manufacturer itself as sanitizing and water-repellent, for better preservation of the good condition of the covering. The paddings, if they present structural issues requiring maintenance, must be handled exclusively by specialized personnel.

ASSISTANCE

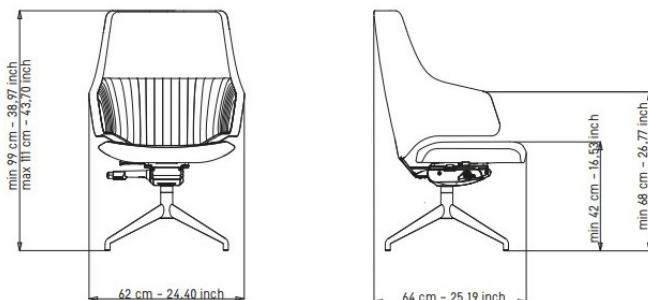

Service operations must be carried out exclusively by specially trained personnel, and requests forwarded directly to LUXY as the manufacturer. Maintenance and component replacements performed by unauthorized personnel will void the warranty.
