MAINTENANCE AND CLEANING

Metal Parts: For cleaning, use specific products for metal polishing to slow down natural oxidation due to contact.

Coating and Padding: Any stains on the fabric coating can be removed either with mild neutral detergents or with specific products recommended by the manufacturer for sanitizing and water repellency, ensuring better preservation of the coating's condition. Padding, if exhibiting structural issues requiring maintenance, should be handled exclusively by specialized personnel.

SERVICE

Service operations must be carried out exclusively by specially trained personnel, and requests should be forwarded directly to LUXY as the manufacturer. Maintenance and component replacements performed by unauthorized personnel will void the warranty.
